Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Upon further consideration, the restriction requirement has been withdrawn and claims 1-39 will be examined.

Specification

The disclosure is objected to because of the following informalities: The reference to other US applications on page 23 must be completed.

Appropriate correction is required.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The spacer component having a stored position has no definite antecedent basis in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 36, 37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 36 calls for a spacer component that has a stored position. However, the specification and drawings fail to define such.

Art Unit: 3637

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-34 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 31-34 are indefinite in that claim 31 depends from itself. Clarification and correction are required. Claim(s) 4, 5, 35 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define 1): how the adjuster assemblies are located beneath the fixed component (claim 4); 2) how the spacer component is positioned within the channel and below the lower portion of the elongated rail assembly (claim 35); 3) the stored position (claim 36); 4) the cover, astragal bolt receiver, mullion boot, side spacer, and outswing rail assemblies (claim 5) so that an integral structure able to function as claimed is recited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Headrick et al ('173). The patent to Headrick et al teaches structure as claimed including an elongated sill assembly (11) having an elongated channel (fig. 2) extending the length of

the sill having an upwardly extending lip structure (21), an elongated rail assembly, a plurality of adjuster assemblies (13), the adjuster assembly including a base member secured to the channel and an adjustment member (34).

Allowable Subject Matter

Claims 4-39 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Rokicki, Japan, (')771), Ruff, Baczuk et al, Geoffrey, Joffe et al, Camperelli, Heath, Ragland teach structure similar to applicant's .
